

HOSDERE ENERGY
QUALITY, ENVIRONMENT and HEALTH & SAFETY
POLICY

Hosdere Energy targets to product high quality and continuous electric power for their customers and keep maximum level of health and safety workplace conditions for its employees and minimum level of environmental impact by prevention and effective use of natural sources during its electricity production operations with the belief of that everyone has a right to a safe workplace and a healthy environment.

The following policy principles are adopted and committed to reach this target:

- All occupational and environmental accidents are considered to be preventable.
- Integrated management system shall be established, implemented and maintained to ensure effective planning, organization, implementation, monitoring and review of quality, health and safety and environmental controls.
- Determines and announces the targets of the applicable and measurable system with a sustainable system understanding. Ensures compliance with the targets with the consultation and participation of all employees
- Provision of appropriate resources, to ensure healthy environment and safe workplace, mitigate risks, the effective execution of Integrated management system and continuous electric power production.
- Compliance with all relevant national and international laws and regulations as well as the Integrated Management System requirements and Renaissance Holding corporate policies and standards.
- Apply the best available techniques and practices during its operations in order to minimize and where possible prevent the negative impacts on environment from the direct and indirect use of natural resources, emissions to air, water or land.
- Striving for continuous improvement and advances in quality, health, safety and environmental performance by periodic reviews.
- Compliance with ISO 9001 Quality, ISO 14001 Environmental and ISO 45001 Health & Safety management systems standards.

It is our common responsibility with our employees, contractors and suppliers, to reach sustainable and successful quality, environment and health & safety policy with obeying the rules and procedures.
